ENERGY-SAVING, POWERFUL PRESENTATION, EFFICIENT

# Temperature-safe Presentation.

**SIRIUS®** onTop  
**ECOplus**

# SIRIUS® onTop ECOplus – Temperature-safe presentation with the plus of SIRIUS® quality.

Temperature-safe, energy-efficient and powerful presentation. This is what the AICHINGER counter series SIRIUS® stands for. The SIRIUS® onTop ECOplus is the ideal solution for the presentation of temperature-sensitive meat products such as pre-packaged minced meat and poultry up to +2°C product temperature. The self-service refrigerated unit is compatible with all SIRIUS® modules, fits perfectly into the counter line and can also be installed as a gondola or wall-mounted.

## POWERFUL PRESENTATION

The SIRIUS® onTop ECOplus is available with a glass attachment and glass sliding elements made of insulated glass. This affords a large presentation volume and easy removal. The optional intermediate display improves the visibility of the goods.

## EFFICIENT

The flow behavior of the self-service refrigeration unit operated with circulating air creates a high level of operational reliability and temperature stability. This protects the goods on offer. The highly efficient refrigeration technology enables reliable, energy-efficient and HACCP-compliant presentation.

## ENERGY-SAVING

The SIRIUS® onTop ECOplus is ideal for presenting so-called EU minced meat and other pre-packaged temperature-sensitive meat products in a temperature-safe, attractive and energy-efficient manner (energy efficiency classes B to C).

## YOU BENEFIT FROM

### Functionality

Compatible with all SIRIUS® modules

### Flexibility

Variable installation: in the counter line, as a gondola or wall-mounted

### Temperature stability

Temperature-safe presentation up to +2°C product temperature (e.g. for packaged minced meat)

### Handling

Showcase-style glass top with high product visibility
